POWER IN SERVICE

Professionalism, reliability, impartiality and dynamism are our distinctive traits.

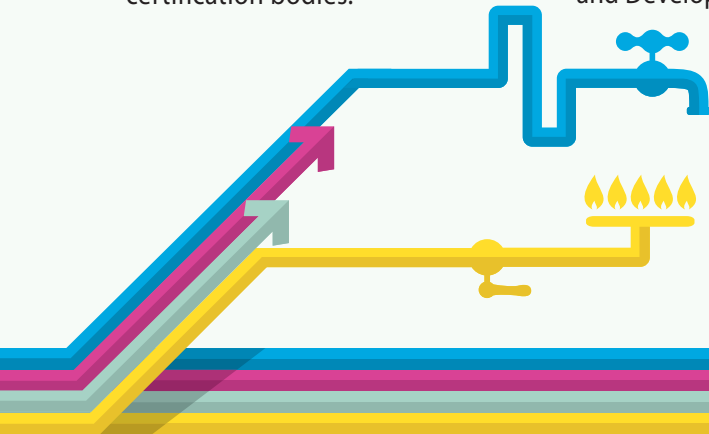

TTR Institute is an independent and consolidated company specialized in carrying out tests and inspections according to reference standards.

- ✓ Test laboratory accreditation no. 0777L issued by ACCREDIA in conformity with the requirements of the **UNI CEI EN ISO/IEC 17025** standard (for details of accredited tests, see the list published on the website www.accredia.it).
- ✓ International recognition by major certification bodies.

TTR's **Core Business** concerns fluid conveyance systems and all related component parts: pipes, fittings, valves, tapware.

Our highly trained technical staff and state of the art instruments are constantly evolving in order to cater to industry standards and market demands. TTR's **mission** is to support clients in product performance assessment compared to regulatory standards for certification purposes and provide technical support during all Research and Development phases.

TTR Institute s.r.l., through accredited Certification Schemes, verifies professional personnel possess, maintains and improves over time the necessary skills and the set of knowledge required for the assigned tasks.

Fair, independent and impartial assessment of knowledge and skills. Certify skills to operate in a qualified and recognized way on the market. Services to certify and enhance professional skills.

METAL MATERIALS
Certification of welders and coordinators for steel, copper and brass
for the following processes:

- Shielded Metal Arc Welding (SMAW)
- MIG/MAG Welding (GMAW)
- TIG Welding (GTAW)
- Oxyfuel Gas Welding (OFW)

PLASTIC MATERIALS
Certification of welders and coordinators for pipes, fittings, sheets and lining membranes
for the following processes:

- Heated tool welding
- Electrofusion welding
- Hot gas welding
- Extrusion welding
- Solvent welding

FLUORINATED GASES
Certification of technicians working on refrigerator systems, conditioners and heat pumps containing greenhouse gases.
